To Whom It May Concern;

As a retired law enforcement professional and current owner of above listed company I supervise numerous individuals placed on formal in-house arrest by the local court systems as well as others.

On several occasions I have monitored subjects who have utilized the Ray Of Hope home as many of these people do not have friends or family that will allow them into their homes due to past criminal conduct. Being a last "ray of hope", so to speak, the Ray Of Hope has given several individuals a place to stay and restart their lives as productive people of the community.

I have been impressed with the way Bob & Peggy Christensen and their son, R.J., have not only opened their home but have worked with me to keep these individuals on track and even gotten many of them back into the main stream of society. They seem to consistently enforce values against criminal behavior and point the way the re-establishing one's productive lifestyle.

It would appear to me that a fair amount of financial burden is relieved from local government by helping keep these individuals out of welfare type programs and even jail in some cases. I am not sure as to what support, if any, is given to the Ray Of Hope but I truly believe that any support sent their way is well deserved and/or utilized.

Sincerely,

Hal Butler
